What are your main responsibilities?

- Participate in the role of analyst or developer to the delivery of IGA projects in large organisations.
- In the role of analyst: define/optimize/maintain the role model and SOD rules, approve the models by the business, coordinate the downstream implementation, participate to application onboarding and recertification processes.
- In the role of developer: participate in the development and maintenance of IGA solutions such as SailPoint, OMADA, OIM and ForgeRock IM.

What do we offer you?

- A culture of continuous development. At Devoteam, we value people over processes and galvanize potential by working at the forefront of innovation.
- You will develop and grow in an agile and ambitious company where it's okay to take risks, make mistakes and change plans to find transformative solutions. All the while, you will learn from the best, building relationships and skills that will last your entire professional life.
- An attractive and competitive remuneration package with company car, group assurance and DKV.

Soft skills required:

- Team player
- Motivated and result-driven
- Good communicator
- Customer-oriented

Hard skills required:

- Proven experience of 3 years in Enterprise IGA projects
- Experience with IGA concepts such as RBAC, SOD, data classification and recertification
- Good knowledge of IT environments: AD, SharePoint, Unix, DB and custom developed applications
- Knowledge of specific enterprise ERP (i.e. SAP) or mainframe access control models is considered a plus
- Hands-on experience in developing and maintaining IGA projects on SailPoint or OMADA is considered a plus
- Fluent in Dutch and/or French and a good working knowledge of English
